

The Insider's Guide to Franchise Financial Management

Rising to the CFO Challenges

When “Migraines” and “Insomnia” feel like prerequisites

Few care to admit it, but the truth is undeniable: Running the financial operations as a multi-store franchisee will never be easy. Your company is turning to you for financial leadership, but as you add more locations and concepts and your organization grows, so do the challenges. How will you deliver the faster closes, cleaner audits, deeper analyses, regulatory compliance, and multi-unit consolidations that you need to manage and accelerate your growth? When you add it all up, the headaches and sleepless nights are almost inevitable.

The fact is, the financial infrastructure that worked so well when you started out likely can't scale up as you grow. If outdated or constrained financial software infrastructure has held you back, it's time for a better way. Intacct offers powerful, flexible, best-in-class financial management solutions that are transforming how franchise operations increase their efficiency, drive growth, and plan for the future.

In the following pages, you'll read about the secrets of successful franchisee CFOs—the tips that take away the headaches and help them sleep at night.

Say goodbye to spreadsheets

Spreadsheet dependency—it's the addiction no finance pro cares to acknowledge. But its prevalence is understandable: After all, the spreadsheet is the easy, multipurpose tool that everyone already knows how to use.

But, while you may have relied on simple spreadsheets to get up and running quickly with your first few units/locations, spreadsheets are vastly underpowered as you're your business grows. The fact is, too many franchisees take needless risks by using fragile, unsecure, single-user spreadsheets for complex tasks like multi-unit consolidations or cash-flow management. The impact: lost productivity, questionable accuracy, and lengthy stares from your auditors.

Bring efficiency to your franchise operations

With Intacct, you can say goodbye to the time-consuming, error-prone manual processes that drag down finance productivity. Replace the "million spreadsheet march" with smart, streamlined, and automated financial processes, including procurement, fixed assets, and intercompany transactions. Intacct has the flexibility to automate your workflows—without a spreadsheet in sight.

“*Intacct had an immediate impact on our business, solving many of the problems we had with financial management and helping to streamline processes to make managing our business far easier than before.*”

—Brian Singleton, CFO, Fitness Formula Clubs

Improve the speed and accuracy of your reporting

Even an entry-level financial system can churn out the basic financial statements. But as your franchise operation grows, you'll want—and need—much more: accurate, timely, and detailed analyses that go far deeper for real insight into what's driving business performance.

Unfortunately, at too many franchise operations, that translates into a never-ending cycle of daily data extractions from multiple sources in multiple formats with multiple data definitions. What's more, manually creating the calculations and summaries after the data is collected requires additional time and effort. By the time you've got it all together—and burned days of time—the reports are out of date, the questions have changed, and the frustrations have begun anew.

Get in-depth insights, on demand

Intacct gives you comprehensive, real-time financial reporting and analysis so you have an up-to-the-minute picture of your entire organization. Create any report, dashboard, or visualization you need with the precise metrics that matter to your owners, lenders, executives, and store leaders. Ask new questions, get immediate answers, and make confident decisions.

“*We were very impressed with the deep functionality provided by the Intacct financial management system. The increased financial visibility from Intacct's reporting and dashboard capabilities will enable us to better manage our business as we grow.*”

—Greg Hooper, Director of Property Accounting, Gemstone

Consolidate with confidence

When a growing franchise operation has multiple units, geographies, and concepts, bringing all financial information into a unified, cohesive view can be painful and slow. Manually collecting spreadsheets, checking formulas, converting currencies, performing intercompany eliminations—it all adds up to a frustrating, lengthy closing cycle. And as you add locations, the challenge becomes exponentially greater.

Faster consolidations and more efficient closings

Intacct helps you manage the finances of multiple units and concepts. With just one click you can consolidate your financials, automate intercompany transactions and eliminations, and close your books quickly. Intacct also lets you switch between consolidated and local views for detailed insights by locations, concepts, sales categories (e.g. meal type), and time.

And Intacct lets you compare location performance frequently to get insights on comparative performance, capitalize on business opportunities, and take corrective actions faster.

““ *With Intacct, we gain real-time visibility into the consolidated and detailed numbers of our business. We can compare results between our stores over time and quickly react to changing conditions.* ””

—Sandy Ritter, Controller, Buffalo Wings & Rings

Gain new levels of speed and agility

No two franchising operations are alike, so there's no reason for you to endure the constraints of outdated, one-size-fits-all financial software. With on-premises software, you're trapped by major upfront investments, lengthy implementations, static configurations, infrequent enhancements and new features, and a significant maintenance and support burden. But franchisees thrive when they have the agility to adapt to business fluctuations—without waiting months for IT to make changes. You need to keep pace with changing reporting requirements. And you want a system that's tailored to your unique workflows and business processes.

Bring your finance operation to the cloud

It's different in the cloud. With Intacct, you eliminate the hardware costs and IT burdens while your business enjoys the advantages of modern financial software. That means lower costs, more security, and increased productivity. For instance, you receive automatic, quarterly updates—without the disruptions of costly upgrades.

Intacct lets you adapt your implementation—including functionality, reports, and analyses—to stay in step with your changing business requirements. You sidestep the painful capital investments and tap into the power of sophisticated, high-performance financial software that's managed by experts in a world-class data center. And when you add locations, you're using the same software solution, the same chart of accounts, the same vendors—so it's easy to scale up as you grow.

The result? You get to focus on financial management and business performance while Intacct takes care of the software management and infrastructure—all for a single, predictable monthly fee.

“*Unlike NetSuite, Oracle, or other premises-based software that would require us to reorganize our business around a static solution, Intacct's applications mirror our own unique processes.*”

—Robert Wilson, President, Fast Eddie's

Integrate with other key applications—easily

Top-performing franchise operations know: You can't operate efficiently unless everyone can share data easily. No silos. No walls. No barriers. You need easy, real-time access to information from sales, payroll, budgeting, marketing, and other areas to accurately manage the entire financial picture. But when you're bogged down by cumbersome data extracts from your point of sale system and manual rekeying, business agility suffers. How can you tap into the power of other best-in-class applications and avoid the mediocrity of suite lock-in?

Get the flexibility to tailor your workflows

Intacct seamlessly integrates with your entire portfolio of applications from across your IT infrastructure—today and tomorrow. That means you choose the applications you want based on functional fit, not integration capability. You can take advantage of prebuilt, preconfigured connectors for popular applications (including POS and payroll) or easily create your own. Or, thanks to our Web services API, you can create your own customized, automated, two-way integration with the flexibility to tailor your connections for specific workflows and business processes.

Eliminate data re-entry. Streamline your multidepartment processes. And get a 360-degree view of your business: sales, forecasting, customer service, inventory, and more. Intacct breaks down the walls to keep everyone in sync.

““ *We have found Intacct to be very user friendly. Given all the benefits we've seen to date, I wish we would have switched to Intacct sooner.* ””

—Jocelyn Clements , Controller, Stafford Companies

The finance solution that's built growing, successful franchise operations

Don't let your accounting software hold your franchise operation back. Join a growing number of franchisees that are turning to Intacct to increase efficiency in their finance organization while driving new business growth. Intacct helps you move beyond the constraints and inflexibility of outdated accounting solutions by delivering a smart, modern, cloud-based financial management and accounting system for growing franchise operations.

- **Built by and for financial pros:** The Intacct cloud ERP solution provides unprecedented depth and sophistication for finance teams—more than you'll find in rigid suites—so you can be productive and insightful quickly. It's no coincidence that the American Institute of Certified Public Accountants named Intacct its preferred provider for financial applications.
- **Built for growth:** Simply reacting and responding to issues isn't enough. Intacct's scalability puts you in position to drive growth by automating the complete range of basic and complex accounting processes so you can focus on analyzing real-time business performance.
- **Built for success:** With a pay-as-you-go subscription model and cloud architecture, Intacct is aligned with your ongoing success. Maybe that's why Intacct customers achieve, on average, a 250 percent ROI and a payback period of less than six months.
